DETAILED ACTION

Election/Restriction

1. The election requirement of Paper No. 3 is withdrawn.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 13, drawn to an ignition mixture, classified in class 149, subclass 108.6.
 - II. Claim 11, drawn to process for making an ignition composition, classified in class 149, subclass 109.6.
 - III. Claims 12, drawn to the use of an ignition mixture as an igniter, classified in class 102, subclass 201.
3. The inventions are distinct, each from the other because of the following reasons:
4. Invention I is independent and distinct from Invention II because Invention I does not pressing of the composition that is specified in Invention II.

Invention II is independent and distinct from Invention III because Invention II does not require using a composition as an igniter that is specified in Invention III.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3641

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species based on the ignition composition (i.e. Applicant must elect one of each component of the composition, such as the oxidizer, primary explosive, secondary explosive, reducing agent and any additional additives) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 11, and 12 appear to be generic.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
